Vigilo

SOLUTIONS

APP tracker: phone location with an SOS button

See on the map where your team's or family's phones are and get an alert as soon as someone presses SOS. Free for the first 12 months.

APP TRACKING · PHONE LOCATION

Turn any phone into a GPS tracker

With the VIGILO GPS APP, see on the map where every phone on your team is and get an alert as soon as someone presses the SOS button.

- Real-time tracking of up to 10 phones
- SOS button with an instant alert and the user's location
- Very easy to use: just START / STOP TRACKING and SOS

MAIN FEATURES

Everything you can do with the APP

Real-time tracking

See the latest position of every phone on the map, updated every few seconds.

SOS button

With a single tap the user sends an alarm with their exact location.

SOS notification

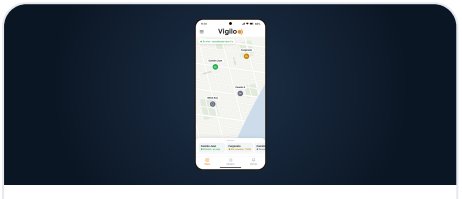
"User XXX has pressed the SOS button" alert, with buttons to call them or get directions.

Up to 10 phones

Register your devices with a name: truck, van, car, motorbike or phone.

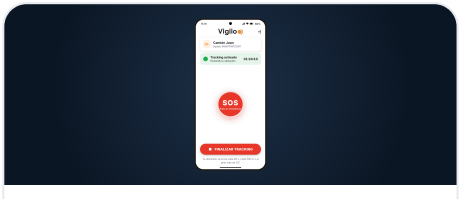
WHAT THE APP LOOKS LIKE

Simple for the user, complete for you



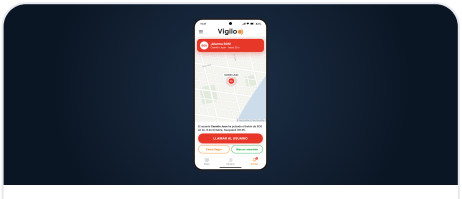
Real-time map

All your phones on one screen



SOS button

The user just starts tracking and, if needed, presses SOS



SOS alert

Call the user or open the route to get there
